<https://www.nytimes.com/interactive/2020/04/07/technology/coronavirus-internet-use.html?smid=em-share>

Operator	Data surge
NHK (Japan)	35-40%
BT (UK)	35-60% daytime
Telecom Italia	35% mobile 63% fixed
Verizon (US)	52% in VPN traffic
AT&T (US)	Voice minutes: - 33% mobile - 75% Wi-Fi - 64% fixed
Facebook	100% in voice calls 50% in text messaging

# COVID-19 brings both opportunities and challenges

---

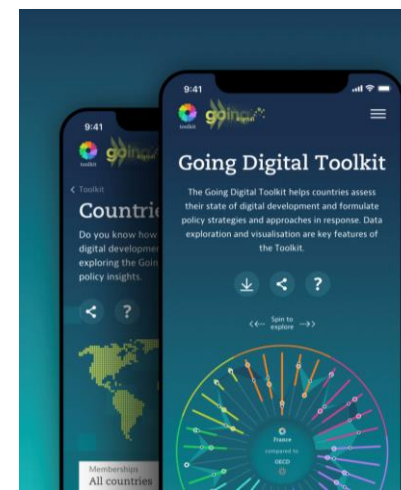

- **A catalyst for structural change**
  - “Gone digital”: growing demand for teleworking, e-health, streaming, e-commerce, telecommunication services, platforms, AI, etc.
- **Highlighted the importance of resiliency and managing risks**
  - Science and technology, research and development and data
  - Infrastructures for the digital economy: communication networks
  - Digital security, privacy, desinformation

# Going Digital Integrated Policy Framework

[www.oecd.org/going-digital-toolkit](http://www.oecd.org/going-digital-toolkit)

# Digital Security

- **COVID-19 brief :**
  - [Dealing with digital security risk during COVID-19 crisis](#)
- **Key messages:**
  - Digital security risk is increasing as malicious actors take advantage of the coronavirus (COVID-19) epidemic.
  - Individuals and businesses should exercise caution when they receive coronavirus-related communications, and use appropriate digital security “hygiene” measures
  - It is essential that governments raise awareness, monitor the threat landscape and publish easily accessible guidelines for digital security hygiene,

## OECD Recommendation on digital security

- Recommendation on Digital Security Risk Management for Economic and Social Prosperity (2015) (<https://oe.cd/dsrm>)
- Recommendation on the Digital Security of Critical Activities (2019) (<https://oe.cd/dsca2019>)
- Guidelines on Cryptography Policy (1997) (<https://oe.cd/crypto>)

# Privacy and data governance

- **Two COVID-19 briefs and related workshop:**
  - [Ensuring data privacy as we battle COVID-19](#)
  - [Tracking and tracing COVID-19: Protecting privacy and data while using apps and biometrics](#)
- **Key messages:**
  - Policy makers, in consultation with privacy enforcement authorities, must assess the possible trade-offs in data utilisation during this crisis (reconciling the risks and benefits)
  - Fully transparent and accountable privacy-preserving solutions should be embedded by design
  - Data should be retained only for so long as is necessary to serve the specific purpose for which it was collected.

## OECD Recommendation on privacy

- [OECD Privacy Guidelines](#) (2013) (review of the implementation ongoing)
- [OECD Recommendation on Health Data Governance](#) (2016)

# Consumer Protection

- **COVID-19 brief:**
  - [Protecting online consumers during the COVID-19 crisis](#)
- **Key messages:**
  - Many consumers are now vulnerable and there are increasing reports of unfair, misleading and fraudulent commercial practices online.
  - Governments should avoid rolling back consumer protection and product safety measures, while considering ways to reduce the administrative burdens on business.
  - Increased international and cross-sector co-operation among government agencies, businesses, and civil society. Information sharing has become more valuable than ever, particularly for agencies with limited resources.

## OECD Recommendation on consumer protection

- [Guidelines for consumer protection on e-commerce](#) (2016)

# Artificial intelligence

- **COVID-19 brief:**
  - [Using artificial intelligence to help combat COVID-19](#)
- **Key messages:**
  - Encourage the sharing of datasets and to help AI researchers build effective tools for the medical community
  - Ensure that AI systems are trustworthy and aligned with the OECD AI Principles: they should respect human rights and privacy; be transparent, explainable, robust, secure and safe; and actors involved in their development and use should remain accountable.

## OECD Recommendation on AI

- [Principles on Trustworthy AI](#) (2019)

## More on OECD AI

**Watchdog Calls India's Citizenship Law 'Discriminatory'**

Human Rights Watch says new law, nationwide verification process threaten citizenship rights of millions of Muslims. Human Rights Watch has termed India's new citizenship law as discriminatory in a new report. The Citizenship Amendment Act along with a planned nationwide verification process to identify illegal immigrants is a threat to millions of Indian Muslims, said the report released on Thursday. The...

# Connectivity

- **COVID-19 brief:**
  - [Keeping the Internet up and running in times of crisis](#)
- **Key messages:**
  - Demand for broadband communication services has soared (as much as a 60% increase in Internet traffic)
  - Operators and content providers have to date successfully maintained services, but additional short term measures are important to avoid congestion and enhance network stability and resilience.
  - In the medium term, regulators and policy makers should prioritise fostering affordable high-speed broadband services

## OECD Recommendation on broadband

- [Recommendation of the Council on Broadband Development](#) (2004) (ongoing review)

## More on OECD & broadband

- Thematic reports and a [broadband data portal](#).

# Connectivity – opportunities and challenges on a sharper relief

- **Some countries have harnessed opportunities:** Korea for example – OECD leader in terms of fibre connections in the OECD (81.7% broadband subscriptions were fibre connections) – has made connectivity an integral part of the Korean recovery plan in order to “convert the crisis into opportunity” and harnessing 5G, IoT and AI to emerge as a digital powerhouse.
- **But disparities between rural and urban areas remain:**

Percentage of households in total and rural areas in the EU with minimum 30 Mbps of fixed broadband coverage, 2018

# Global co-operation to fight COVID-19

We can do more for people and companies if countries co-ordinate on mutually reinforcing measures. A globally co-ordinated policy response is absolutely crucial.

OECD Secretary-General Angel Gurría

TACKLING CORONAVIRUS (COVID-19)  
CONTRIBUTING TO A GLOBAL EFFORT

**“WE NEED A LEVEL OF AMBITION  
SIMILAR TO THAT OF THE MARSHALL  
PLAN – WHICH CREATED THE  
OECD – AND A VISION AKIN TO  
THAT OF THE NEW DEAL, BUT  
NOW AT THE GLOBAL LEVEL.”**

ÁNGEL GURRÍA  
OECD SECRETARY-GENERAL

## OECD COVID-19 Platform

The OECD launched a **dedicated platform** with data, country policy tracker and policy recommendations related to COVID-19:
